***Examiner's Amendment***

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Paul White, Jr. on 5/1/2006.

The application has been amended as follows:

In the claims:

Cancel claims 3 and 4.

In claim 1, after "pigment" and before ".", insert -- ;

wherein the particles of the titanium dioxide pigment is obtained by pulverization of titanium dioxide pigment in a fluid energy pulverizer; and

wherein the fluid energy pulverizer uses a gas as a pulverizing medium and the hydrolysis product of the alkylsilane compound represented by the formula (1) is added to the pulverizer during the pulverization of the titanium dioxide pigment --.

Change the dependency of claim 5 to claim 1.

Change the dependency of claim 6 to claim 1.

***Allowable Subject Matter***

Claims 1-2 and 5-13 are allowed.

Art Unit: 1755

Prior art of record does not fairly teach or suggest applicant's process for producing a titanium dioxide pigment including each and every element claimed, particularly the fluid energy pulverizer used as a means to pulverize the titanium dioxide pigment.

Applicant succinctly stated that the wet and dry processes are sufficiently different in the arguments of 12/23/2005 and pointed to their relevant examples in which whiteness is comparable to the prior art and an improved resistance to discoloration, lacing and heat during processing.
